- Full range of tests available at competitive prices
- Technical and sales support included from our large team of traders, nutritionists and field service staff
- Let us test it, then let us sell it – guaranteed service, guaranteed support, guaranteed payment
- Dropbox available at your local WB Hunter store

WHY SHOULD I GET A FEED TEST REPORT?

From minimising weight loss to maximising milk production, there are so many reasons to get a feed test. It simply means you know exactly what you are buying, which helps you build an appropriate feed ration, which all helps you make money and get value for your inputs

HOW DOES IT WORK?

You simply take a number of core samples from your hay, fill in our sample request form and drop it into our Shepparton lab (or drop into your nearest WB Hunter store and we'll get it to the lab for you). If you're not near a store, you can just post it to us! Then we'll test it and email you an NIR Feed Test report. It's that easy!

WHY SHOULD I CHOOSE A FEED TEST AGENT?

FeedTest have calibrations built over a period of thirty years, and are some of the most robust in Australia. They are an AFIA "A" grade lab, a level achieved by very few labs, and due to all calibrations being built on Australian results, FeedTest will consistently outperform other labs.

WHY SHOULD I CHOOSE WB HUNTER?

With our 70+ years of experience in the industry, we are able to test your product, then market your product for you, so you maximise your profit while minimising your workload. We offer support from our trained staff, as well as guaranteed payment for those who choose to sell product through us. Just another case of locals supporting locals!
